Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

- I. Claim 1-10, drawn to a nanoelement doped by an enclosure, classified in class 257, subclass 9.
- II. Claim 11, drawn to a singly doped nanowhisker, classified in class 257, subclass 9.
- III. Claim 12-16, drawn to a nanoelement doped by a second material, classified in class 257, subclass 9.
- IV. Claim 17-30, drawn to a nanoelement doped by second and third material, classified in class 257, subclass 9.
- V. Claim 31-35, drawn to hetero nanoelement doped intrinsically during formation, classified in class 257, subclass 9.

2.

3. The species are independent or distinct because The methods for doping.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The inventions are distinct, each from the other because of the following reasons: Since the methods for doping said nanoelements are mutually exclusive.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 2891

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
